**MOR/ryde's Offerings Expand Beyond Suspension
Systems with Custom Metal Fabrication Services**

*MOR/ryde's Metal Fabrication Services Provide a Wide Variety of End Products for Several
Industries, Including Medical, Industrial and Recreational Vehicles*

ELKHART, Ind. – MOR/ryde has long been known as a company that provides high-quality suspension systems for the RV industry. Now, the company has expanded its offerings beyond innovative suspension and pin box systems to other industries with its custom metal fabrication services.

MOR/ryde's metal fabrication services are available to companies within a wide range of niche markets, including those in the recreational/commercial vehicle, trucking, industrial, agricultural and orthopedic industries. MOR/ryde makes a variety of customized end products, from folding ramps for motorhomes to complicated bridgebacks used in hip replacements.

“Now MOR/ryde isn't just about providing suspension systems to the RV industry,” said Jack Enfield, marketing director of MOR/ryde. “With our metal fabrication services, we can now provide our OEMs with a full line of fabrication, welding, and painting capabilities combined with cutting-edge technology.”

To provide top-notch fabrication capabilities, MOR/ryde recently purchased the Adige LT712D tube laser cutting system. The new system allows for quick set up and efficiency in job change over, resulting in production of more parts per hour and increased cost-effectiveness for MOR/ryde's OEM customers.

-more-

MOR/ryde's fabrication capabilities allow the company to be a full service supplier, from material procurement to cutting, forming, welding and assembly. In addition, MOR/ryde features a state-of-the-art, 7-stage powder coating line for superior part coating. MOR/ryde also offers customers engineering expertise to assist in product design with the goal of achieving maximum product efficiency while maintaining cost control.

About MOR/ryde International

Founded in 1966, MOR/ryde International has provided rubber suspension systems for a variety of applications including recreational vehicles, specialty trailers, school buses, transit buses and specialty vehicles. Developed with performance and reliability in mind, the MOR/ryde suspension provides a smooth ride, excellent stability and requires minimum maintenance. These benefits are backed by a commitment to customer service and satisfaction.

MOR/ryde has brought this same customer based commitment to our Metal Fabrication Division. The division is dedicated to working with customers to manufacture products to their specifications. With an outstanding engineering and manufacturing team, MOR/ryde can take a product from inception to fabrication to weld to coating. For more information, contact MOR/ryde at 574-293-1581 or visit the company's web site at www.morryde.com.
