

# MOUNTING THE (JP54-023) HINGE ROTOPAX MOUNT

\*Easily mounts to the Heavy-Duty TJ hinges, sold separately

1. Place backer clip inside the upper hinge tube behind the left most hole. (with the tailgate open the inside of the tube can be accessed from the back side.)
2. Insert bolt through the top hole in the carrier and thread it into the backer clip
3. Repeat process with the lower hinge.
4. Tighten both bolts to secure the carrier to the hinges.
5. Attach rotopax mount to carrier (sold separately) - use lower position for one gallon container or use upper position for larger containers

NOTE: • Process is much easier if spare tire is removed before installation  
• Maximum spare tire size compatible with the carrier is 33"
