

# RUBBER SHACKLE SUSPENSION SYSTEM

The airless suspension

Above. Beyond. Always.

FOR YOUR  
**PICKUP TRUCK**

AND  
**MOTORHOME**

# TODAY'S ROADS ARE ROUGHER THAN EVER

Works to absorb the harsh road shock

Whether the application is a motorhome, pickup truck, or specialty vehicle, the RS suspension is the answer for today's rough roads. Since this system achieves the smoother ride without the need for costly air bags or air maintenance, we call the RS "the airless suspension."

At the heart of every RS suspension system are unique rubber shear springs. MORryde incorporates rubber's natural ability to isolate and absorb road shock into a suspension system that works in harmony with the existing leaf spring suspension system. The result is a significantly smoother ride. Whether over chuck holes, dirt roads, railroad tracks, or uneven highways, the RS suspension works to absorb the harsh road shock. The RS system does all this with no air leaks, compressors, or air lines. That means simplicity of operation and a more cost effective alternative.

The RS system can be easily installed onto most motorhomes or pickup trucks.

Above. Beyond. Always.

# FIT CHART

Ordering a MORryde RS System for your pickup truck or motorhome is very simple and straightforward. Please identify the following:

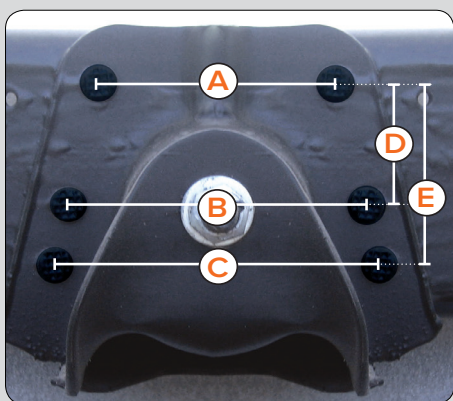

- 1 YEAR** of your vehicle.  
(Class A motorhomes will need the chassis year.)
- 2 MODEL / SERIES** of your vehicle.  
(Class A, B and C chassis will need chassis specs.)
- 3 GROSS AXLE WEIGHT RATING REAR (GAWRR)** of your vehicle.
- 4 HOLE PATTERN MEASUREMENTS** of the rear spring frame hanger on the rear axle. (See details on right.)
