

STOREGATE INSTALLATION

FOR 1997-2002 TJ JEEPS

- 1 Line up Storegate in desired location on tailgate. Make sure area is clean and Storegate will not interfere with function of the tailgate. Recommended location pictured.
- 2 Identify desired screw positions per location on Storegate in Step 1 and pre-drill holes using 1/8" drill bit.
- 3 Apply supplied bulb seal in tailgate indentation where Storegate will be installed.
- 4 Realign Storegate with bulb seal in desired location.
- 5 Screw Storegate into tailgate using supplied self-drilling screws. Tighten screws just enough to compress bulb seal.

NOTE A key is supplied to lock and unlock the latch on the hardcover version; however, the latch may be left unlocked to be operated without the key. A key is not supplied for the netted version.

STOREGATE INSTALLATION

FOR 2003-06 TJ JEEPS

1

Line up Storegate in desired location on tailgate. Make sure area is clean and Storegate will not interfere with function of the tailgate. Recommended location pictured

2

Identify desired screw positions per location on Storegate in Step 1 and pre-drill holes using 1/8" drill bit. Note that the middle screw on the right side does not need to be pre-drilled due to the location of the vent.

3

Realign Storegate with bulb seal in desired location and screw Storegate into tailgate using supplied self-drilling screws. Tighten screws just enough to compress bulb seal. Note that the middle screw on the right side does not need a screw to be added due to the location of the vent.

NOTE A key is supplied to lock and unlock the latch on the hardcover version; however, the latch may be left unlocked to be operated without the key. A key is not supplied for the netted version.
