

Trail Kitchen Accessory: **JP54-076**

ADJUSTABLE TRAIL KITCHEN ENCLOSURE

INSTALLATION INSTRUCTIONS

Designed to be used with the JP54-038 Trail Kitchen

STEP 1

Place your cooler/freezer on to the Trail Kitchen Base (JP54-038). Measure from:

- The bottom of the cooler/freezer to the bottom of the freezer handle.
- The bottom of the cooler/freezer to the top of the lid.
- Note these measurements as they will be used in determining the placement of your freezer cover support strap (#4 on the diagram*) and your adjustable freezer cover top (#2 on diagram).

STEP 2

Using (4) Cap Screws and Nylock Nuts (#5 and 6 on diagram), affix the *Freezer Cover Molle Grid Side* (#1 on diagram) to the right side of the Trail Kitchen Base.

○ Insert screws here

*Product diagram on opposite page, for reference.

ADJUSTABLE TRAIL KITCHEN ENCLOSURE

INSTALLATION INSTRUCTIONS

STEP 3

Using (4) Cap Screws and Nylock Nuts (#3 on diagram), affix the Freezer Cover Side to the left side of the Trail Kitchen Base.

STEP 4

Using (4) Cap Screws and Nylock Nuts, affix the Freezer Cover Support Strap to the back side of the Trail Kitchen Enclosure.

Note: the strap should mount just below the bottom of your cooler/freezer handle.

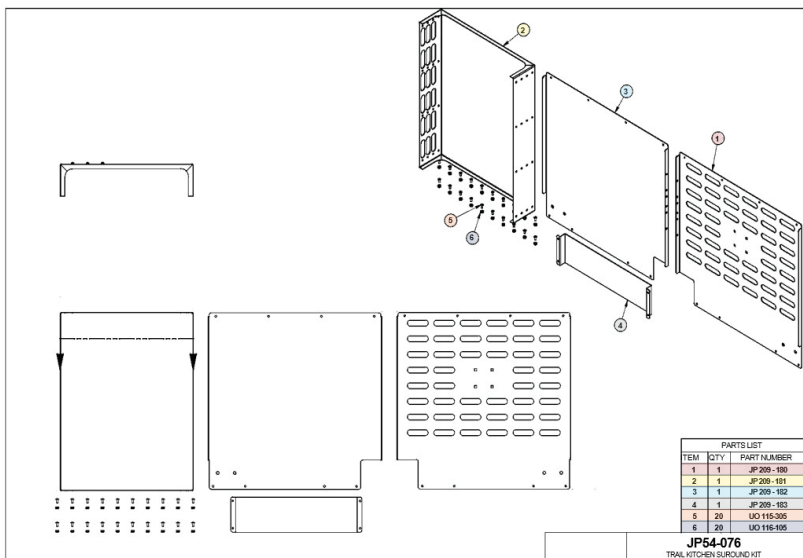

STEP 5

Use the (8) remaining Cap Screws and Nylock Nuts to affix the Freezer Cover Top to the two Freezer Cover Side Panels.

Note: there are four holes vertically spaced one inch apart to adjust the enclosure top panel. Ensure that the bottom of the panel is higher than the top of your cooler/freezer.
